

## Overview of Blooming Genius Solutions & Services 2018: Individual Bookings

Programme	Target Audience	Summary	Duration	Options	Cost (excluding vat)
	<p>Young people between the ages of 6 and 18.</p>	<p>We pride ourselves on doing things differently: Our Positive Assessments place a particular focus on identifying the young person's strengths and how these can best be used to achieve success in school and beyond.</p> <p>We do also test specific common difficulties; this is so we can provide useful advice to the young person, the parent/s and the school about how best to manage these difficulties. We always place these within a context of the child's strengths – likening a cognitive difficulty to a physical one, such as needing glasses for reading but having good distance sight.</p> <p>Our reports are designed to be easily understood, with information for school staff about the impact that the child's strengths and difficulties will have on learning in the classroom and how the young person can best be supported to achieve success.</p> <p>The report contains information for the young person so that they are empowered to celebrate their strengths and communicate and manage their difficulties confidently.</p> <p>The assessment is carried out by an assessor with British Psychological Society recognised qualifications. Please see our information leaflet for further information.</p>	<p>Approx 2.5 hrs hours</p>	<p>The assessment can be delivered at your child's school or in the home for an additional fee.</p>	<p>Individual: £295 (at one of our assessment days)</p>
	<p>Young people between the ages of 6 and 18.</p>	<p>The full cognitive educational assessment includes a comprehensive range of verbal and non-verbal cognitive ability tests and, as appropriate, assessments of processing speed, motor skills and memory. It also includes a range of attainment tests in reading, writing and mathematics to evaluate differences between ability – the young person's cognitive <b>capacity</b> and whether their performance in school and attainment in academic subjects matches this potential.</p> <p>The report contains detailed information and analysis of the results in an easy to access format along with advice on how to best support the young person to learn at their best and achieve success. In line with our principles, there remains a strong emphasis on the young person's strengths and how to build upon these.</p>	<p>3 - 4 hours</p>	<p>The assessment can be delivered at your child's school or in the home for an additional fee.</p>	<p>£450 (at one of our assessment days)</p>

Programme	Target Audience	Summary	Duration	Options	Cost (excluding vat)
	<p>Young people 4 to 18 years old</p>	<p>The full term 1:1 coaching programme is provided over a period of ten weeks and includes:</p> <ul style="list-style-type: none"> <li>5 face-to-face 1.5 hour coaching sessions</li> <li>Summary report following each session</li> <li>Four online webinars to reinforce models and strategies</li> <li>Programme booklet covering all of the key models used.</li> </ul> <p>The coaching programme takes place within the school or home, with between 15 and 30 minutes of the 90-minute session working with the parent/carer or significant adult as well as the young person, wherever possible. Coaching is ideal for any young person who is struggling at school or at home and would benefit from gaining a better understanding of their cognitive processes and developing new strategies to support themselves. Areas explored might include self-regulation, stress management, communication, memory, organisation, time management and finding directions as well as strategies for young people with specific difficulties in areas such as literacy and mathematics.</p>	<p>10 weeks</p>	<p>Sessions can be delivered in the school if prior agreement is gained from the head teacher.</p>	<p>£540</p> <p>We can arrange payment through instalments.</p>
	<p>Parents and Carers of Young People struggling at school or home</p>	<p>A unique training programme which enables parents and carers to support their child in recognising, exploring, understanding and feeling in control of their cognitive and resulting behaviour patterns through a series of carefully adapted models and specific tools.</p> <p>The programme supports a coaching rather than delivery approach; this means that any changes are driven and designed by the child and more likely to have high positive impact and be sustained over the longer term.</p>	<p>20 hours</p>	<p>Please register an interest and we will contact you with dates of the next course. We are launching an online version of this course. Again, please register an interest and we will contact you when this is available.</p>	<p>£179 if booked individually.</p>
